Download PDF Ebook and Read Online Positron Annihilation In Semiconductors%0A. Get **Positron Annihilation In Semiconductors%0A Electron positron annihilation Wikipedia**

Electron positron annihilation occurs when an electron ( $e^-$ ) and a positron ( $e^+$ , the electron's antiparticle) collide. The result of the collision at low energies is the annihilation of the electron and positron, and the creation of gamma ray photons:

Electron-positron annihilation is the process in which a positron collides with an electron resulting in the annihilation of both particles. Electrons (or  $-$  particles) and positrons (or  $+$  particles) are of equal mass but opposite charge. Positrons are the antimatter equivalent of an electron, produced from
